PROFILE

I am a Sr. Software Developer with over 6+ years experience creating beautiful & scalable web application using **NextJS, ReactJS**, JS / TS, HTML/CSS and **NodeJs/ .NET Core.**

SKILLS

NextJs	ReactJs
●●●●●●●○○	●●●●●●●○○
CSS / SASS	**TS / JS**
●●●●●○○○○	●●●●●●○○○
NodeJs / .Net	**Azure / AWS**
●●●●●○○○○	●●●●●○○○○

ACHIEVEMENTS

- Got **ExtraMile** award at HCL.
- Runner-ups on **thirdweb x HashNode** Web3 Hackathon.
- Microsoft Certified: **Azure Fundamentals** (AZ-900).

EDUCATION

- PG-DAC @Sunbeam Institute, Pune MH (2018).
- B.Tech E&TC @R.I.T Sangli MH (2017).

WORK EXPERIENCE

SR. SOFTWARE DEVELOPER

Rightpoint - A Genpact Company (employer)   Aug 2022 - Present

Project : GPT - Genpact Value Share For Claims

- Developed beautiful and scalable web application using **NextJS,** ensuring optimal functionality for GPT Claims (HRC, Remittance Data).
- Created reusable functional components and custom hooks using **ReactJS** & **Typescript** for improved efficiency.
- Integrated APIs with UI elements using **Axios** for seamless functionality.
- Implemented **Redux Toolkit** state management library for efficient application state handling.
- Utilized **MUI** components with Custom Theme design to enhance the consistent design and user experience.
- Developed protected routes with user authentication & authorisation.
- Implemented unit testing for different components using **Jest** and **RTL**, significantly improving code coverage.
- Independently managed high and medium priority user stories, ensuring timely delivery.
- Collaborated with internal team and client stakeholders to address technical queries and implement improvements.

Project : Morgan Stanley - E*Trade (client)

- Developed all new React MS-E*Trade Platform modules, including loc, t-money, mea, challenge, etc.
- Migrated all trading applications from Angular to React, handling development, testing, deployment, and maintenance throughout the process.

SR. SOFTWARE DEVELOPER

HCL Technologies (employer)

Siemens PLM, Pune (client)   Sept 2021 - Aug 2022

- Developed dashboard for PlantSight Web Platform Using **ReactJs**.
- Implemented **Redux Toolkit** state management library for efficient application state handling.
- Created **BFF** layer to filtered out required data properties for platform.
- Improved performance with scroll data lazy loading for data grid.
- Implemented functionality like sorting, filtering and searching for table.

FULL-STACK DEVELOPER

Bentley Systems, Pune   April 2018 - Sept 2021

Over the span of 3.5+ years, I've dedicated myself to various projects, leveraging the power of the **ReactJS** and **.NET Core** stack to drive innovation and create impactful solutions.

Software Engineer I   April 2020 - Sept 2021

- Worked with Bentley **iTwin Web Platform** Dev Team.
- Developed backend services using **C#** and **.NET Core** with expertise to architect robust and efficient solutions.
- Detailed hands-on experience with Testing Tools such as **Jest, RTL** and **xUnit** ensuring the quality and reliability of our products through rigorous testing practices.

Associate Software Engineer   April 2018 - March 2020

- Worked on Frontend Bentley **Software Downloads Web App**.
- Worked on Backend Bentley **Entitlement Services**.

PERSONAL-DEV

- NextJs / React Ecosystem **(ReactJs, TanStackQ, RTKQ, Redux, Mobx, Context API).**
- Web Dev **(HTML5, CSS3, ES6+Feat, JS/TS, MUI, Tailwind CSS).**
- Repo & CI/CD **(Azure DevOps, GitLab, GitHub & BitBucket, Jira).**
- Orchestration & Services **(Docker, NodeJs, REST API).**
- IAAS like **Microsoft Azure, AWS.**
